

SketchCleaner – Technical Data Sheet

MagPaint Europe B.V.
Riezenweg 2, 7071 PR Ulft, The Netherlands

1. Description

SketchCleaner Spray is a blue, water based cleaning agent in spray bottles, suitable for cleaning SketchPaint. The product can be sprayed onto a cloth or directly onto the dirty SketchPaint, so that stubborn SketchMarker stains can be removed without effort. SketchCleaner will also remove the invisible oily residue that is left behind by whiteboard markers, making the SketchCleaner an important tool for everyday maintenance. It is available in individual spray bottles of two sizes, or as part of our SketchCleaner Kit with an additional microfiber cloth and a set of SketchMarkers.

2. Equipment

Always use a soft cloth in combination with our cleaner spray. The Microfiber cloth from our SketchCleaner Kit is guaranteed safe to use. Do not use cloths or sponges that are abrasive, and avoid materials that give off colour when it comes in contact with solvent.

3. Usage

Spray the SketchCleaner onto your cloth or soft sponge, or directly on the surface to be cleaned. Allow it to work for five seconds, then wipe the surface with a suitable clean cloth.

4. Storage

SketchCleaner should be kept in the original closed container in a well ventilated and dry place, not in direct sunlight.

5. Safety

SketchCleaner has a characteristic odour. Avoid breathing vapour, and avoid contact with eyes. CleanerSpray is completely water soluble and non-flammable.

6. Specifications

Colour:	Clear blue solution.
Density:	1,001 - 1,003 Kg/L.
pH:	4,65 - 5,65.
